

retail version of SampleRobot 2.4 available soon

– the NAMM show, booth #6832

Anaheim, California – January 16th 2007 – ESI Audiotechnik GmbH will soon start to ship the brand new retail version of SampleRobot 2.4 from SKYLIFE via the worldwide ESI distribution network.

SampleRobot 2.4, the latest version of the award-winning SampleRobot software from SYKLIFE, provides a major number of new functions compared to the previously available retail versions. The MSRP of SampleRobot 2.4 will be \$349 US, the MAP will be \$299 US.

Among many other new features, the new WaveRobot (which will also be available as a separate product in the future) is a major addition. The extremely powerful tool finds perfect loop points in wave files automatically. A high speed graphic engine with full zoom functionality makes WaveRobot a very comfortable software to work with. New export formats such as the Wusikstation SND format have been added to SampleRobot. ASIO support has been improved to support more professional audio interfaces. There is a new feature that removes audio content after the looped section to keep the data on the hard disk smaller, new drag & drop features for key sample arrangements have been added, tool tip help is now available, and much more! The new retail version of SampleRobot even ships on a DVD with a premium sample library in excellent SKYLIFE quality.

More information about SampleRobot and the forthcoming WaveRobot can be found on www.samplerobot.com and www.esi-audio.com. Journalists interested to review SampleRobot 2.4 can contact us to receive NFR versions of the software.

ESI Audiotechnik GmbH is one of the leading vendors for professional and semi-professional audio equipment worldwide. ESI is the exclusive worldwide distributor for retail software products from SKYLIFE.

SKYLIFE stands for innovative sound concepts in the field of film music and sound design. Apart from the high-quality DVD products composer Christian Halten has a long experience in sound creation. SampleRobot has been the first successful software product developed by SKYLIFE.
